Khmer

English

PROFILE

Results-driven Web Developer with experience developing responsive applications at the Ministry of Interior. I have a proven ability to bridge the gap between creative design and functional code using modern frontend tools. Dedicated to clean architecture and seamless user experiences, I am looking to leverage my technical skills and three months of professional experience to help build impactful digital products.

PROJECT

Project 1: Full-Stack E-commerce Platform

- Architected and developed RESTful web APIs using ASP.NET Core and Entity Framework Core, ensuring secure and high-performance data processing backed by a SQL Server relational database.
- Built a responsive, modular single-page application (SPA) using Angular, implementing reactive forms, lazy-loading, and custom route guards for secure navigation.
- Engineered separate, role-based dashboards tailored for Admins (product catalog management, user oversight, sales analytics, and order tracking) and Users (profile management, order history, and checkout).
- Integrated local digital payment solutions via KHQR, enabling seamless, secure QR-code-based transactions and automated payment verification flows.

EDUCATION

SovannaPhumi School — 2019 - 2024

Graduated from high school

Setec Institute — 2024 - Present

Currently in 4rd year in MIS

EXPERIENCE

Ministry of Interior — Dec 2025- Feb 2026

3 month as a Frontend developer
